

Chris Anatalio

Web3 Native Senior Software Engineer

Veteran distributed systems engineer and technical educator. Deep experience in service oriented architecture with broad generalist experience across devops, smart contracts, dev tooling, automation and front-end. Full SDLC expertise across architecture, implementation, automated testing(full testing pyramid), deployment pipelines and service ownership. Specialized in async, reactive, non-blocking, event-driven services.

WORK EXPERIENCE

Senior Developer Advocate Stellar Development Foundation

07/2024 - Present

Remote

Achievements/Tasks

- Built scalable, cloud-native services deployed to K8s providing integration with external services such as Discord & Github
- Automated developer environment setup with Devcontainers and Codespaces
- Mainnet production support of SDK and CLI dev tooling

Developer Advocate Spheron Network

11/2023 - 07/2024

Remote

DePIN Distributed Compute

Achievements/Tasks

- Built dockerized validators and web3 infrastructure
- Rapid application development for reference apps and POCs
- Production support of platform

Technical Author Pluralsight

10/2023 - Present

Achievements/Tasks

- Built full-length course covering blockchain concepts, dev tooling, dApp development and deployment

Platform Advocate ConsenSys

04/2022 - 05/2023

Infura & Metamask

Achievements/Tasks

- Built POC apps leveraging JSON RPC infrastructure
- Learning materials for API usage and client implementation
- OSS code contributions & documentation

CORE COMPETENCIES

SOA

Automated Testing

Smart Contracts

DevOps

Blockchain

Cloud

Scalability

Observability

Linux

Async Services

PRIMARY TECHNICAL SKILLS

Web3

Rust, Typescript, Solidity, CLIs/Devtools, SDKs

Backend

Java, Typescript, Spring, nest.js, noSQL/RDMS

DevOps

Docker, Devcontainers, K8s, AWS, Bash, Linux

EDUCATION

BS Computer Science

Virginia Commonwealth University

Richmond,VA

CERTIFICATES

Blockchain Specialization Certificate (01/2023)

University at Buffalo - C3KPD4259F5D

WEB3

Developer DAO #4727

WORK EXPERIENCE

Senior Software Engineer Skyward, a Verizon Company

05/2019 - 03/2022

Achievements/Tasks

- Built async, reactive Microservices architecture with Java, Spring, Websockets, RabbitMQ & gRPC

Portland, OR

LinkedIn Learning Author - Tech LinkedIn

12/2016 - 01/2022

Achievements/Tasks

- Full-stack courses covering async, reactive, non-blocking hands-on coding

Carpinteria, CA

Senior Software Engineer OpenGov

07/2017 - 04/2019

Silicon Valley Govtech Startup

Achievements/Tasks

- Built async, reactive services with Java, Vert.x & Spring

Portland, OR

Senior Software Engineer Nike

05/2016 - 07/2017

Tasks/Achievements

- Built scalable, cloud-native services supporting high-volume pricing data

Portland, OR

Software Engineer Ippon Technologies

07/2014 - 05/2016

Richmond, VA

Software Engineer RTS Labs

07/2010 - 07/2014

Richmond, VA

Front-End Engineer Sidus Group

01/2010 - 07/2010

Systems Analyst Bank of America

08/2009 - 01/2010

Richmond, VA

Software Engineer Circuit City

05/2008 - 06/2009

eCommerce Team

Tasks/Achievements

- Java MVC Applications

Richmond, VA
